Fig. 14

The figure is a 16x16 grid representing a 16-point DFT. The horizontal axis (top and bottom) is labeled with values from 0 to +12, with 0 at the center. The vertical axis (left and right) is labeled with values from 0 to +12, with 0 at the center. The grid shows a pattern of black squares representing non-zero values. A dashed line runs from the top-left to the bottom-right, indicating a diagonal relationship. The values are symmetric about the center.
